Stand on any stretch of Florida coastline and what do you see? A few terns and gulls circling overhead, sandpipers rushing the outgoing tide to see what meals it uncovered, perhaps a dolphin leaping and playing. You'll be delighted by the intimate details of these creatures' lives. Pregnant northern right whales spend the winter in northeast Florida waters. Their calves are 13 to 15 feet long and weigh between 1,700 and 1,800 pounds...
